The Free Banana.

The action of the fariff conference committee in soting to leave bananas on the free list is, in one respect at least, significant. It disarras the critics of the measure of one of their favorite and most frequently brandisted weapons. Making the Army Popular.

Making the Army Popular.

Secretary Daniels and Secretary Garrison are putting new and seasonable ideas into their respective departments. The former has augnosted that the nary instead of being regarded meetly as a great fighting machine held in readiness for some contingent need be conducted ation as a tiberal school whose members may acquire practical education that will make them useful to themselves and to the country as citizens in time of peace as well as in the event of var. Secretary Garrison advocates a kindred policy for the army, it is high time, be believes that something be done to bring the army into closer touch with the daily interest of the public. "The great need of the United States army," he has well said, "is that the people of the United States should know more about it and care more about it." One means to this end, the Secretary thinks, is to shorten the term of enlistment and give the mém a vocational training that will fit them for some gainful pursuit when they are back in private life. Such a plan would doubtless attract to the army hundreds of young men who now are discouraged to enlist because of the fact that at the will of four years, if they wished to retire, they would be no better prepared for self-support than at the beginning of their term. "But suppose, any one with the colors. A young man just out of school would be gialed, of the opportunity to get still a properties of the control of the reserved with the colors. This plan, together with a system of vocational saining, would induce a greater number and a dishing, would induce on cultisament, it would speadily build up a reserve force, one of the army's prime needs, and at the same time it would make the army a onstructive and far-reaching influence for practical education.

Utilizing the Parcel Post

To Reduce the Cost of Living.

Efforts are being made the country over to utilize
the baried post as a direct medium of acchange to
tween the producers, and the consumers of table sup
piles. The post offers rich opportunities in this
respect, but they have not yet been turned to decrea
count. Hundreds of farmys; have butter and expeccount. Hundreds of farmys; have butter and expecand other products which they wish to sell at farprices. Thousands of city fibuseholds are ready and
eager to buy. An between the farm and the city
runs the parcel post with its relatively low read
and deliveries. It only remains for these potential
selliers and buyers to relige their conjunous advantage.

But the producer and the consumer, as the Baltimore Sun points out, must make themselves known
to each other; and in this connection the Sun offers
a timely suggestion: "Why should not the farmer's
selling clubs and advertup their products and fine
rear locality within the twenty-pound zone
formation of the country sellors,
and thus a regular and reliable source of supply and
demiand could be established as to certain products
which are needed in the household every day.

What has become of the old-fashioned man whithought a woman should not have been engaged any oftener than she had been married, and that one marriage was enough for any woman?

The Tearing Up of Streets.

The Tearing Up of Streets.

Atlantians can keenly sympathize with the writer in the Louisellie Courier/sournal who complains that the repair and extension of water or gas pipes and electric condutts "is one of the things that gets on the newves of citizens who pay taxes and take pride in their place of habitation." In the business district, a torn-up street impedes traffic and discourages trade, in residential districts, it is a particularly rasping nuisance and sometimes a serious damage to property. Most regretable of all, however, are the waste and inefficiency which the repeated tearing up of thoroughters betrays in a city's management. Progressive municipalithes are giving this matter carness attention. The current issue of the Engineering Record noise a number of regulations that have been adopted in this regard, among those of New York," age the Record, "previous to the laying of a new pacement the city departments and stilly companies which have subsurface structures are notified, and ordered to make such repairs, renegoids and extensions as will care adequately for their services for neveral years to come. Good Work for Soil Improvement.

Good Work for Soil Improvement.

The campaign of education which representative fertilizer manufacturers are conducting in the interest of soil improvement is typical of a new economic era in the South?

The farm, though always recognized as the ultimate source of our prosperity, has until years comparatively recent been regarded as a thing apart from the daily concern of commerce and industry. But now the progressive merchant and manufacture are getting into practical intimate touch with the problems of the farm and with its opportunities.

This is oxidenced, in the liberal support given corn clubs by business men, in the demonstration trains sent out by railreads and in the co-operation of bankers with caterprises for rural development.

Particularly useful is the publicity campaign the Southern fertilizer men are now carrying on in behalf of soil improviment. The fact that they are helping thousands in the interests of the articular timerests. The capital tool this manifest to farming interests. The capital tips this manifest is admirable and is characteristic of modern business and the progressite South.

The Tennessee Gander Pulling

The entire state of Tennessee has been stirred up recently by the announcement that a gander pulling was to be a feature of the Tennessee State fair at Nashville.

Gandee pulling is defined by the Standard Dictionary as "a crust restite sport consisting in a manager as "a crust restite and the standard properties of the standard properties at full speed past the place where the bird is subsended or pinned to the ground." The present generation knows little about sander pulling except from pulling was at one time a popular form of ammensent in some parts of the south and west.

We Have Passed Overnight From Summer Into Autumn

And Chamberlin-Johnson-DuBose Co.'s Ready-to-Wear Section Presents in a Fine Degree of Completeness

The New Season's Authentic and **Authoritative Fashions**

"Be not the first by whom the new are tried Nor yet the last to lay the old aside."

Women are concerned principally now by the latter admonition---the passing of the autumnal equinox precluded the possibility of one being the first to try the new.

It is time now for the new styles!

Soon we will be getting late---and no one wants to be the last to lay the old aside.

The Chamberlin-Johnson-DuBose Co. display of fall fashions has been timed to this moment of certainty---of certainty as to what is *genuine and authentic* in style.

And now it speaks with that authority.

No, it does not speak but exhibits with that authority. This advertisement can never disclose the wealth and beauty and surpassing variety of the Ready-to-Wear Section. It can but throw out a few hints and leave it to woman's interest in the fall fashions to see what has been done in representation (or this arrangement). done in preparation for this announcement.

There is a completness and thoroughness about things here this season that has never been attained before—the progress we have made over last year seems greater than from any other one season to another.

Is it the diversity of the styles that Paris has given us, is it extra effort on our part?

It is both. Paris has given us varied styles, we have worked with determination that must put this Ready-to-wear Section first in the minds and hearts of Atlanta women.

What is the style?

Here Are Hundreds of Suits of Different Styles

And the happy result is a season where the strict following of an arbitrary law gives place to the abstract—becomingness, that is the style, as you shall find here, and that is why we stress the bigness of this display.

Becoming Suits for hundreds and hundreds of women

If there is one style that is notable above others it is that the cutaway coat is the motif of the fashions. It seems to run through the scheme of things. It is varied—very, very varied.

There are citaway coats that button close about the k, others have the wide lapels and the general appeare of a man's evening coat, others are fashioned to show apestry or brocaded vest over the bust, others show the t at the waist; and then there are others—and very art—that are fashioned with a sash to hold the coat to a

All of which means that women may have a stylish suit that best becomes them! All of which means that women may have a stylish suit that best becomes them!

Long shoulders are noticeable, sleeves hardly begin to be sleeves until they are brought below the shoulders. The butterfly or kimono effect is the result. In many of the "dressy" suits this butterfly effect is carried out with a seamless back and a big butterfly bow at the back waist. The word "faney" fits in with the new styles, as the cutaway coats, the draped skirts, the trimmings (fur bands, skunk, fitch, broad-

tail chinchilla and ermine, tapestry and velvet vests, velvet buttons, collars and cuffs) and the fabrics—velours, matellasse, diagonals, wool failles, wool crepes, duvetyne and peud de peche —all these tend to make suits this season fancy and the colors, the rich mahogany shades, the greens—bottle and bronze—the prune shades, tete de negre.

These points show in

-a broadtail suit with skunk collar and cuffs.

—a broadtail suit with skunk collar and cuffs.

—a taupe bayadere cloth suit with velvet collar and wide revers, a tunic of cloth over velvet.

—a black duvetyne blouse model with sash, Oriental embroidered vest and peg top skirt.

—and, to prove the scope of styles this year, in a ruby chiffon cloth suit, with a long, straight Balkan coat, edged and belted with velvet and having a collar of sable squirrel.

a combination suit has a coat of tete de negre matelasse and a draped skirt of peau de peche in the same shade. The coat has a collar of gold and prune tapestry. But it seems hardly fair to mention a mere half dozen suits out of all these that worthy and distinctive.

See them with your own eyes and judge how well we have solved the suit prob-lem for the women of Atlanta this Fall.

The New Dresses Are Charming Affairs

Exquisite Evening Dresses, Glorious Afternoon Costumes and Smart Street Dresses.

Fact is we doubt if one could shop in Paris with such satisfaction as one may right here! The fashions that the wizards scattered over Paris have evolved are gathered here within arms reach:—you may see and study them all, side by side---reproductions, yes, and therefore sans the prices of the originals.

To tell you that we have gathered great and numbers of more beautiful dresses this season than ever before is but to tell what will probably be the first expression of those who know us best.

The styles are not simple, the richness of fabrics, of colors and the masses of laces and nets rob the evening and afternoon dresses of simplicity and create a glory that is new.

And therefore one must be circumspect this season. Good taste is never gaudy---and in the hands of the lesser artists the richness that is the mark of fashion becomes a mass of colors---bizarre and outre. Not so here.

One dress after another of surprising

A salmon pink Canton Crepe has a six inch wide girdle of blue chenille, embroidered in green and vellow and terra cotta flowersoriental in the extreme...the girdle ends in a long navy streamer. A bold combination of long navy streamer. A bold combination of colors and a beautiful one. The bodice is covered with sand colored chantilly lace.

A bronze crepe dress has a bodice of shadow lace, wide black moire girdle, a red corsage rose, the skirt drapes most gracefully.

A dainty affair, a chiffon dress of morning light blue underbodice, with lavender girdle and little French flowers on bodice. The skirt shows an over-drop of shadow lace.

Dresses for street wear take in more richness. The materials—woolen crepes, woolen matelasses, diagonals, charmeuse, the new corded silks, the silk brocades and the silk matelasses show the tendency, as do the always draped skirts, the use of sashes, the frillings at the sleeves and necks, the "vest effects" in oriental colors. There is much of interest here right now. interest here right now.

When the other is dead for a three.

isn't a complete answer, but we trust you minde the bus of ordice involved.

YES, INDEED.

A certain paper has written us to shoot in a statement conce the ultimate winner of the next world's strice. Why should we give such valuable information with the rent due and our thin summer facing a long, hard writter? We'd like to ic club like and passibly fish, but there are limits.

Area har importance.

After cleaning up Cleveland the Senators lost no time in receding. They had done the work, and nobly, that Fate had given them to do. Her had been the work and nobly, that Fate had given them to do. Her that Washington's main assignment from one generation unto another should be the job of mailing the everlasting pide off Cleveland any time the Nope entertained nor dearw or thought of winning a flag. And Washington has always made food:

Our idea of nobody to try and catch is Ty Cobb entering the home stretch a length to the good. The fellor is hard enough to catch when him behind.

No wonder America has felt a thrill of risks over the _nglish invasion from Vardon and Ray with the Big Four dismounted, McLoughlin in California and both Cobb and Jackson centering up a civil war of their own.

Many have gone to California with very little capital and become wealthy. The opportunities are just as plentiful now. Make your reservations today over the
